

PUMPKIN STENCIL

CARVING INSTRUCTIONS

1

Prepare pumpkin by cutting a circle around the stem to create a lid, then gut the pumpkin (**reserve the seeds for roasting!**).

2

Print the stencils you would like to use and **tape the stencil** to the best-looking side of the pumpkin.

3

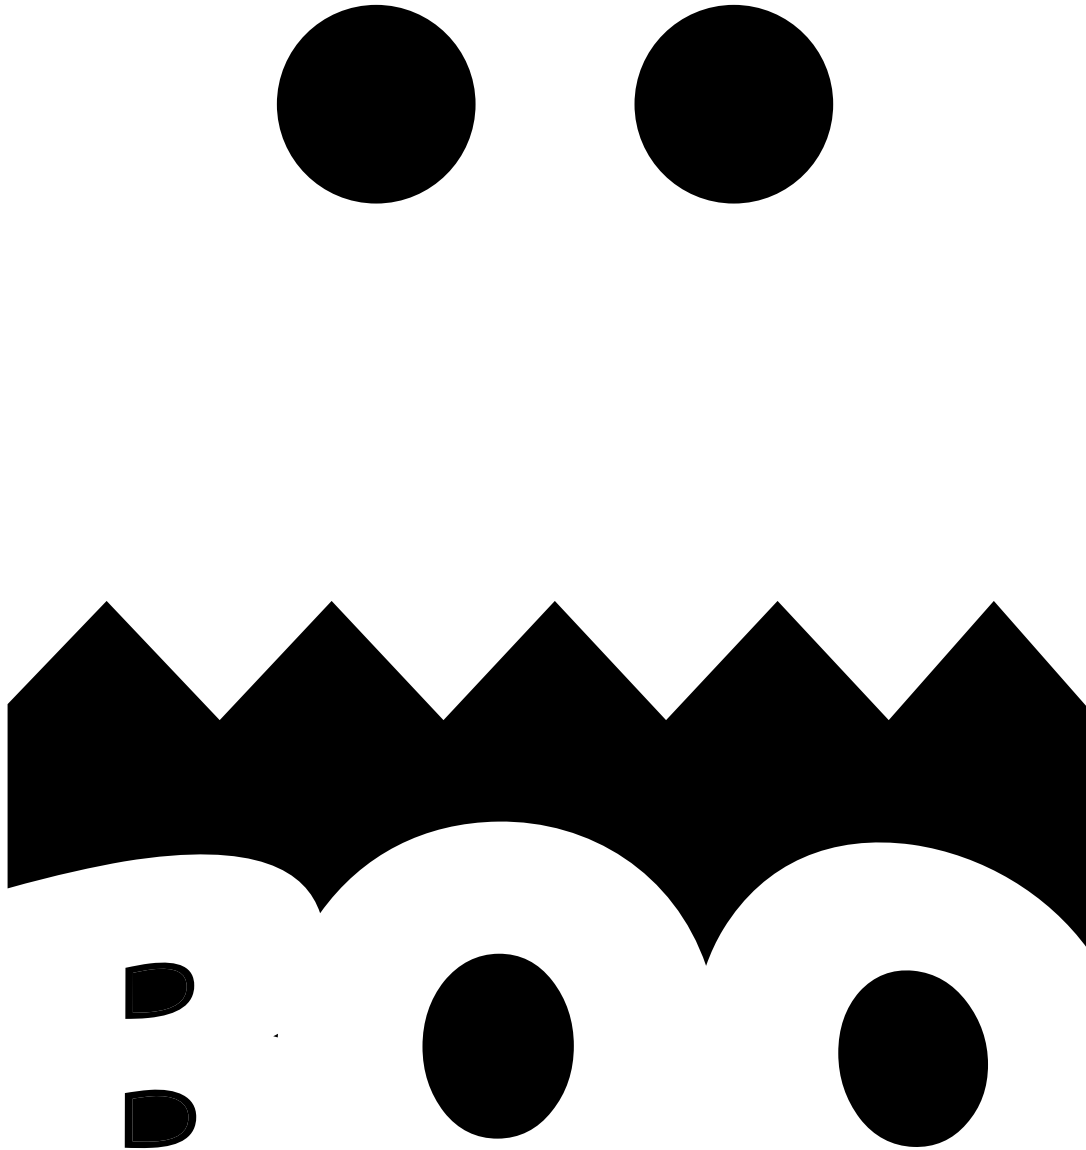

Using the transfer tool from your pumpkin carving kit (even a toothpick or a pen would work), **press tiny holes around the lines** of your stencil pattern, being sure that you can see the holes, but that you are not pushing all the way through the pumpkin.

4

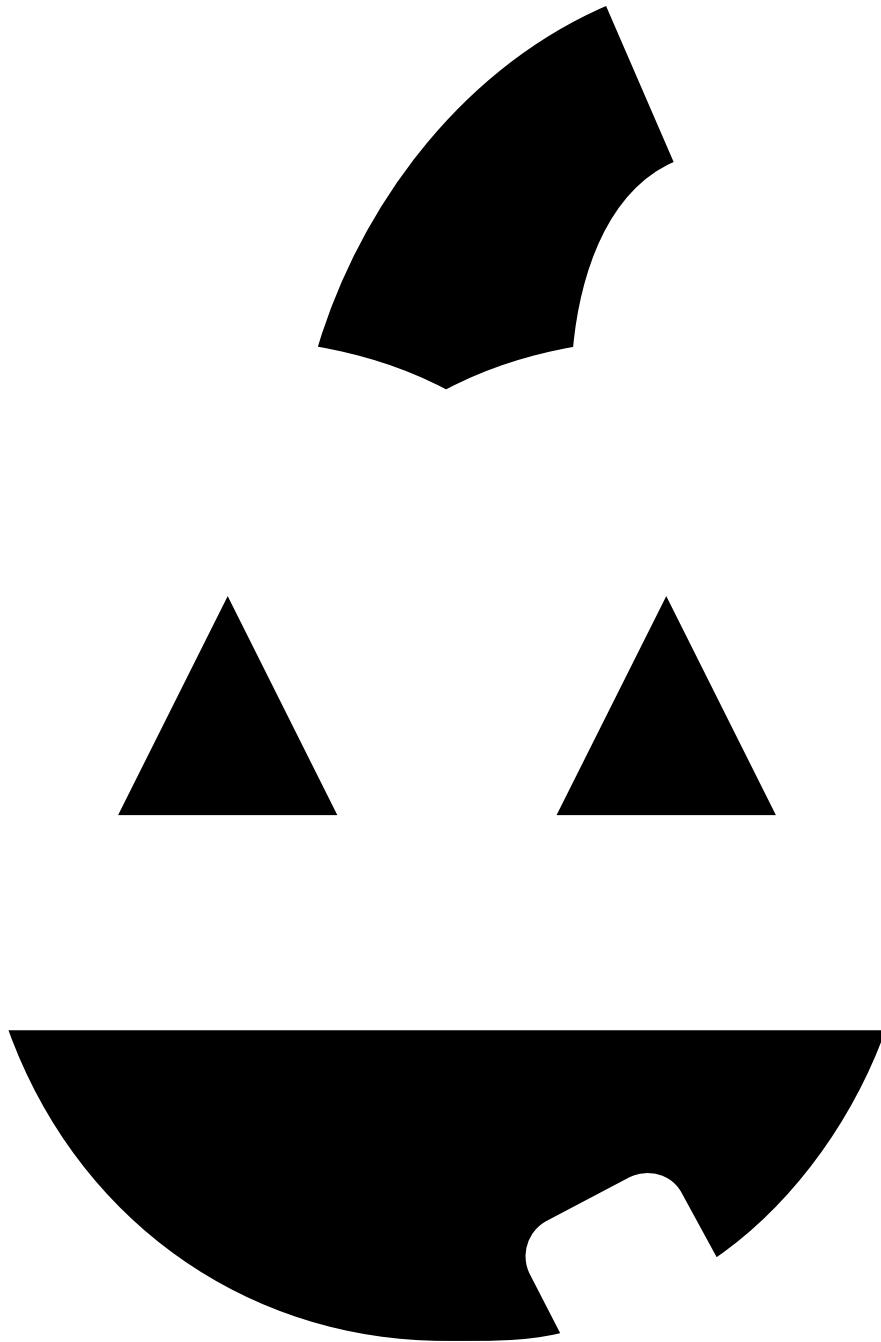

Lastly, carefully **cut along the dots** and push out the pumpkin flesh to **reveal your design**.
